Loop (From a tag, view an action in the time of your choice – Right click on the play button)

Clip Recording button (Start / stop)

Navigate in time
Timeline button

Tags button

The Live & Replay application gives you access to the live feeds of the match with several angles of view. It gives you the opportunity to replay actions, tag them and record video sequences.

How to save your recorded clips

1 - Go through the menu button on the left corner.

2 - Click on "Open the video directory". You can find here your video file.

3 - Just drag & drop your video file on your flash drive.

Take advantage of a dedicated VOGO central server to upload all your match streams and create a video database accessible to your staff. They can either view the videos on VOD or download them.

Mobility – Ergonomics – Efficiency – Sports performance
