

RC BOOMMIC

The RC BoomMic solution is an anti-noise PPE certified to EN 352-2 and 352-6, combining a pair hearing protection coupled with a microphone capable of ambient noise.

Perfectly compatible with our VOKKERO GUARDIAN communication system, the BoomMic solution allows you to be protected from noise while communicating hands-free with your team. But above all, the combination of ELACIN noise filter and VOKKERO ensures clear, reliable communication in the noisiest environments. The earphones are adaptable for both left and right ears. ELACIN RC protectors are made from soft, lightweight material and are easy to insert and remove.
